and technology

INF1511 NEWS!!!

- We still have NO appointed e-tutors.
- Please use the additional resources from the safari / o'reiley sources.

Overview

- Set Up of the programming environment.
- The theory of **decisions** in programming and the IF ... ELIF structure.
- The practical application (and demonstration) of **decisions** in programming.
- The assessment of learning in this unit.
- The additional resources available for this unit.

Environment Set-Up ***

- Please read the read-me-first document.
- On the internet, find ANACONDA installation.
- Install ANACONDA,

ANACONDA

 ANACONDA NAVIGATOR

Applications on base (root)

Channels

Refresh

console_shortcut

0.1.1

Console shortcut creator for Windows (using menuinst)

Launch

JupyterLab

1.1.4

An extensible environment for interactive and reproducible computing, based on the Jupyter Notebook and Architecture.

Launch

Notebook

6.0.1

Web-based, interactive computing notebook environment. Edit and run human-readable docs while describing the data analysis.

Launch

powershell_shortcut

0.0.1

Launch

Qt Console

4.5.5

PyQt GUI that supports inline figures, proper multiline editing with syntax highlighting, graphical calltips, and more.

Launch

Spyder

3.3.6

Scientific Python Development Environment. Powerful Python IDE with advanced editing, interactive testing, debugging and introspection features

Launch

Glueviz

0.15.2

Multidimensional data visualization across files. Explore relationships within and among related datasets.

Install

Orange 3

3.23.1

Component based data mining framework. Data visualization and data analysis for novice and expert. Interactive workflows with a large toolbox.

Install

RStudio

1.1.456

A set of integrated tools designed to help you be more productive with R. Includes R essentials and notebooks.

Install

VS Code

1.53.2

Streamlined code editor with support for development operations like debugging, task running and version control.

Install

Theory – What are decisions in programming?

- Input required to decide.
- *If it is raining, then you use an umbrella!*
- Input from
- A system. Input, processing and output.
- Use the input to decide on the processing code execution, which will determine the output

Flow Control in Programming

- Linear
- Decisions ... select a flow control for execution.
- Repetition ... use flow control to execute code multiple times.

Decisions in Programming

- The decision determines the processing, and the processing determines the output of the system.

Programming elements

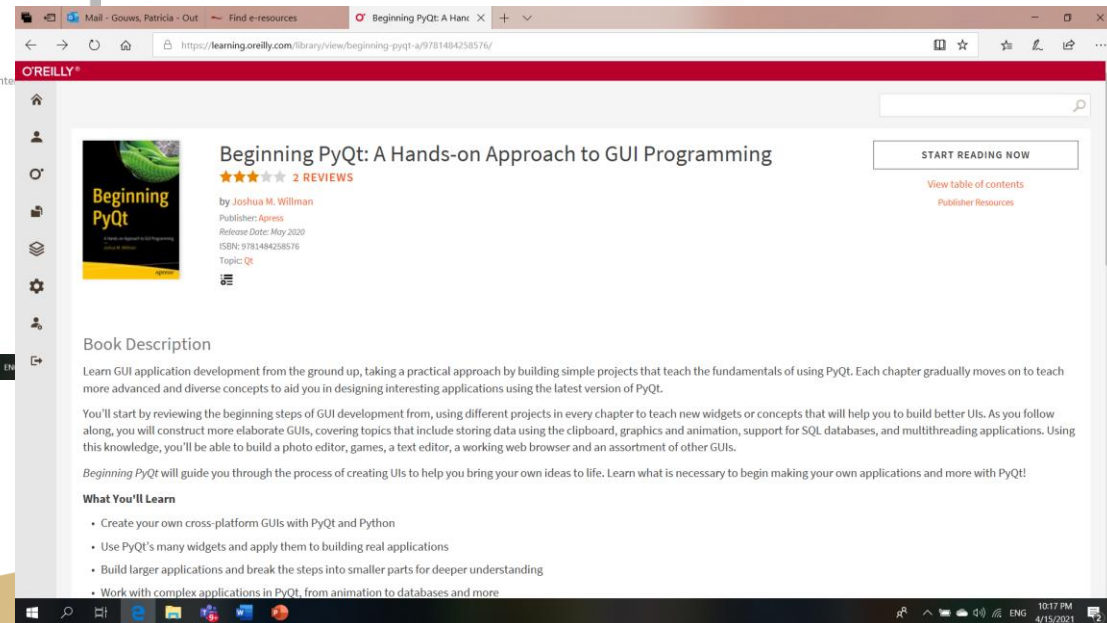

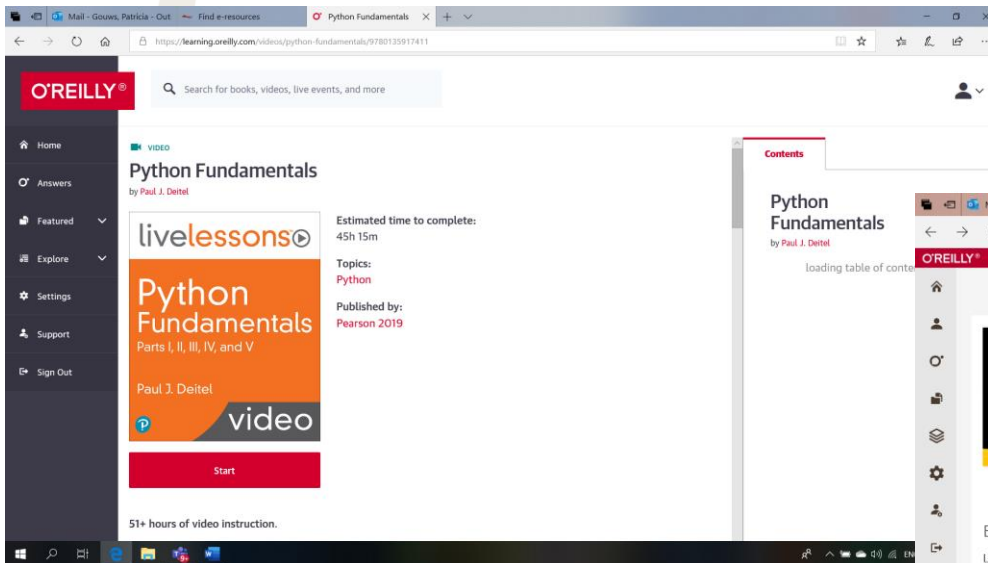

- Literals - _____
- Variables - _____
- Keywords (30 in Python ... and else elif exec ...)
- Comments #
- A keyword is IF and ELIF

Assessment for Unit 2

- **Theory MCQ quiz is** available. 3 attempts. Available until 9 October 2023.
- **Programming activities** on Jupyter Notebook page. Available today. Practise! Use this to complete Assignment 2.
- **Practical MCQ quiz** (Assignment 2) is available. One attempt. Available until 9 October 2023.

Book Description

Immerse yourself in learning Python and introductory data analytics with this book's project-based approach. Through the structure of a ten-week coding bootcamp course, you'll learn key concepts and gain hands-on experience through weekly projects.

Each chapter in this book is presented as a full week of topics, with Monday through Thursday covering specific concepts, leading up to Friday, when you are challenged to create a project using the skills learned throughout the week. Topics include Python basics and essential intermediate concepts such as list comprehension, generators and iterators, understanding algorithmic complexity, and data analysis with pandas. From beginning to end, this book builds up your abilities through exercises and challenges, culminating in your solid understanding of Python.

Challenge yourself with the intensity of a coding bootcamp experience or learn at your own pace. With this hands-on learning approach, you will gain the skills you need to jumpstart a new career in programming or further your current one as a software developer.

What You Will Learn

- Understand beginning and more advanced concepts of the Python language
- Be introduced to data analysis using pandas, the Python Data Analysis library

10:19 PM 4/15/2021

Summary

Unit 2 - Decisions. The implementation of decisions in programming uses the IF ELSE programming structure.

The value of the decision determines the code that will be executed.

Assessment Criteria for Unit 2:

2.1 The if-else statement is used for decision-making.

2.2 A problem is solved by the application of decision-structure.

2.3 Logical and Membership operators are being used.

Thank you
