2.6.2 Creating GUIs with QT Designer

Overview

- Set Up PyQt Designer environment.
- The theory of **a GUI** in programming.
- The practical application (and demonstration) of **a GUI** in programming.
- The assessment of learning in this unit.
- The additional resources available for this unit.

Theory – What is a GUI in programming?

- Classes are
- A system. There is always input, processing and output. A function has input, processing and output.
- The GUI provides space to input data (on widgets), to trigger processing (event driven programming) and to display output (on widgets).

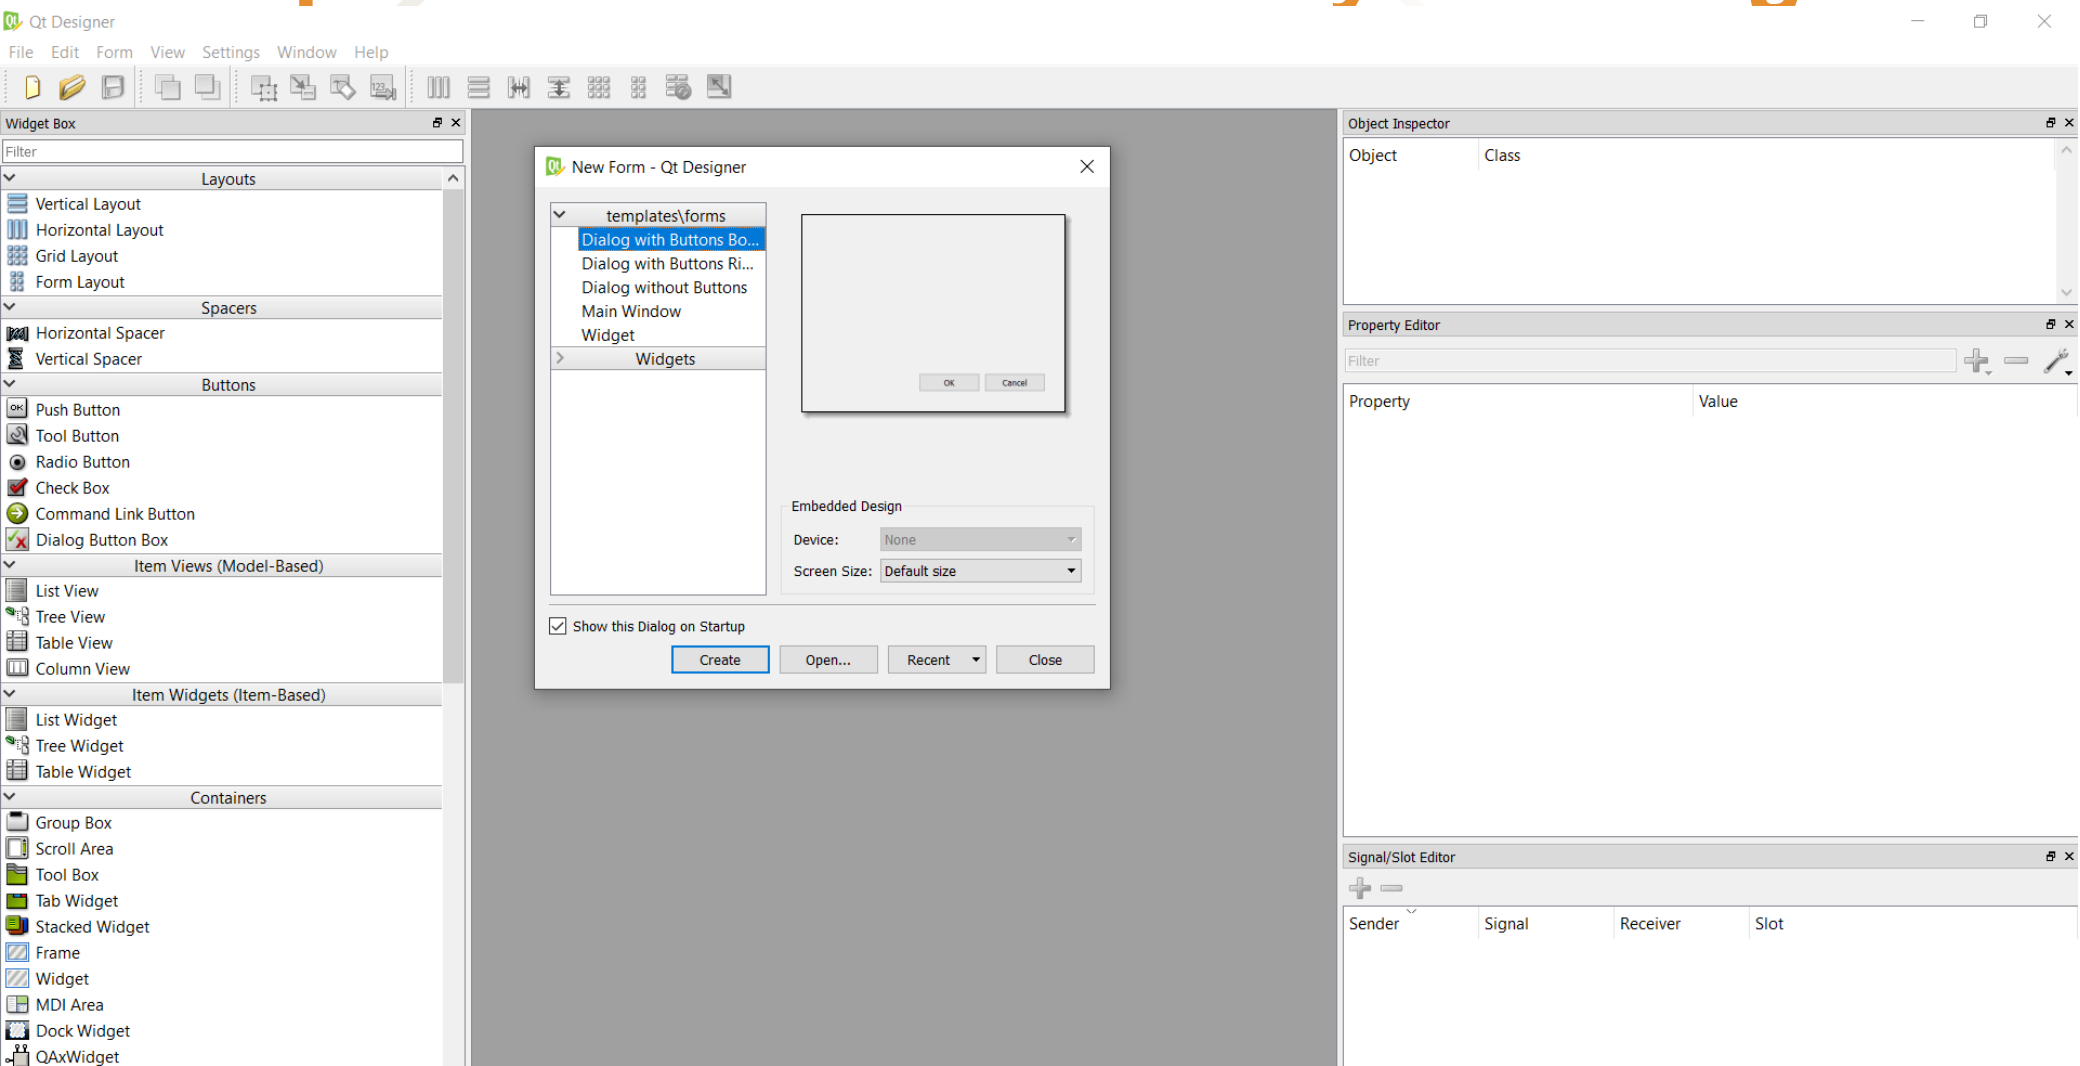

A GUI in programming

- The input, the processing and the output.
- Using WIDGETS
- Must have a GUI that works!
- Widgets for **input** from user (verify input)
- Widgets to trigger **processing** (events)
- Widgets to display **output**

Programming elements

- Literals - _____
- Variables - _____
- Keywords (30 in Python ... and else elif exec ...)
- Comments #
- A keyword is IF and ELIF
- A keyword is FOR
- A keyword is WHILE
- Functions are declared! The keyword is
- CLASS?

Widget Box

Filter

Layouts

- Vertical Layout
- Horizontal Layout
- Grid Layout
- Form Layout

Spacers

- Horizontal Spacer
- Vertical Spacer

Buttons

- Push Button
- Tool Button
- Radio Button
- Check Box
- Command Link Button
- Dialog Button Box

Item Views (Model-Based)

- List View
- Tree View
- Table View
- Column View

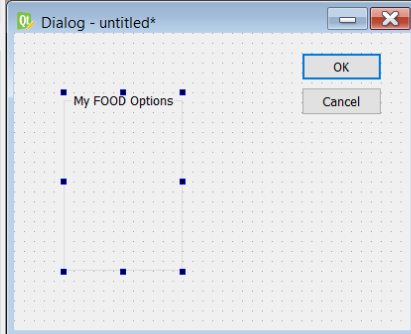

Item Widgets (Item-Based)

- List Widget
- Tree Widget
- Table Widget

Containers

- Group Box
- Scroll Area
- Tool Box
- Tab Widget
- Stacked Widget
- Frame
- Widget
- MDI Area
- Dock Widget
- QAxWidget

Input Widgets

Object Inspector

Object Class

- Dialog QDialog
- buttonBox QDialogButtonBox
- gp...ns QGroupBox

Property Editor

Filter

gpbFoodOptions : QGroupBox

Property	Value
> statusTip	
> whatsThis	
> accessibleName	
> accessibleDescription	
layoutDirection	LeftToRight
autoFillBackground	<input type="checkbox"/>
styleSheet	
> locale	English, UnitedStates
> inputMethodHints	ImhNone
QGroupBox	
> title	My FOOD Options
> alignment	AlignLeft, AlignVCenter
flat	<input type="checkbox"/>
checkable	<input type="checkbox"/>
checked	<input type="checkbox"/>

Signal/Slot Editor

Sender	Signal	Receiver	Slot
buttonBox	accepted()	Dialog	accept()
buttonBox	rejected()	Dialog	reject()

List of children

Enter child's name and surname

Select gender

☐ Male

☐ Female

Widget Categories

- Layouts
- Spacers
- Buttons
- Items Views (large volumes of data)
- Containers
- Input Widgets
- Display Widgets

PyQt

- Different windows
- Designing the GUI
- Event handling from GUI
- Radio buttons (select ONE) or Check boxes
- Scrollbars and Sliders
- List widget (add, edit and delete from list)

Assessment for Unit 8

- **Theory MCQ quiz** will become available today. One attempt. Available until 9 October 2023.
- **Programming activities** for this unit on Jupyter Notebook page. Available. Practise! Use this to complete Assignment 8.
- **Practical MCQ quiz** (Assignment 8) will become available today. One attempt. Available until 9 October 2023.

Thank you
